## L0059W Wiper Harness

The Original Wire Harness is not available. The grey vinyl covered wiper motor wire we supply looks right but the two insulated wires are very light duty but can be used safely if installed as follows...

1. Separate the visible section of the Shield Wire from the yellow and red wires and twist into a single strand. This will be used as the ground wire.
2. Twist the ends of the red and yellow wires together to create the new "HOT" side. This will function fine and will be barely visible.

FIGURE 1

FIGURE 2

Figure 1 shows what the wire looks like before the conversion.

Figure 2 shows how the wire looks after the above procedures.
